

## MongoDB 30

### 1) Create Database product\_detail

use product\_detail

### 2) Show Databases

show dbs

### 3) Create Collection product

db.createCollection("product")

### 4) Show Collections

show collections

### 5) Insert Documents

```
db.product.insertMany([
  {
    item: "pen",
    price: 10,
    quantity: 2
  },
  {
    item: "book",
    price: 50,
    quantity: 1
  },
  {
    item: "pen",
    price: 10,
    quantity: 5
  },
  {
    item: "pencil",
    price: 5,
    quantity: 10
  }
])
```

### 6) Retrieve Documents from Collection

db.product.find()

### 7) Create Index on item in Ascending Order

db.product.createIndex({ item: 1 })

### 8) Show Indexes

db.product.getIndexes()

### **9) Create Compound Index on price Ascending and quantity Descending**

```
db.product.createIndex({  
  price: 1,  
  quantity: -1  
})
```

### **10) Drop Index on price**

**First check indexes:**

```
db.product.getIndexes()
```

**Then drop the compound index:**

```
db.product.dropIndex({  
  price: 1,  
  quantity: -1  
})
```
